

Scientific Innovations Company Pte. Ltd.

Our Company

Scientific Innovations Company Pte. Ltd. is a start-up technology-oriented company based in Singapore. We create new ideas, products and services and create new companies to sell these innovations. We help these small companies to expand by providing investment, resources and connections so that we can grow a global network of companies.

We currently have offices in Singapore, New York and are setting-up in Palo Alto, California and Phnom Penh, Cambodia. We presently have approximately 40 employees in Singapore and New York. Some of our companies are listed below.

1. **Scientific Innovations Company** - <http://scientific-innovations.com/index.php>
Scientific Innovations Company is our parent company. It provides investment, connections and resources to help our smaller companies to grow and develop their products and services. Check the "About" page on our website to see our employees and their roles within the company.
2. **Mirakel Technologies** - <http://mirakel-technologies.com/>
Mirakel Technologies uses internally developed technology in electrolysis to permanently straighten hair without damaging the follicles. Mirakel Technologies operates out of a salon in New York, and our Research and Development of the technology takes place in Singapore.
3. **DLab International** - <https://www.dlabinternational.com/>
DLab International is an orthodontics laboratory which operates out of the Scientific Innovations Company office in Singapore. DLab provides customized dental products and services such as retainers, mouth guards and solid dentistry models. DLab has an experienced team of technicians and administration staff who provide reliable service to orthodontists throughout Singapore. DLab is expecting to open a second lab in Malaysia within the next year.
4. **HomeBakee** - <https://www.homebakee.com/sg/>
HomeBakee is a new concept in the baking world. Home bakers can sell their cakes, brownies, tarts and other baked goods to customers online via the HomeBakee website. HomeBakee caters to private buyers for birthday parties, family gatherings, etc. and also caters for corporate events having served multiple banks and telecommunications companies in Singapore. HomeBakee is based in Singapore but also operates from the office in New York as it expands into the US market.

5. **Lifestyle Therapeutics** - <http://cardiatricshealth.com/>

Lifestyle Therapeutics is a company which promotes healthy living. It recently launched its premium mobile application programme (Cardiatrics) to prevent heart disease. This service provides its users with direct access to clinical nutritionists, health coaches and cardiologists to create a personalised diet and fitness regime to prevent heart disease and lead a healthy lifestyle.

6. **Other Companies in Development**

Kyra – A service which uses clinical technology to create a range of personalized hair-care products (such as shampoos and conditioners) to treat problem hair conditions.

Majesty Real Estate and Service Pte. Ltd – Majesty is a construction company based in Phnom Penh. It was co-founded by Dr. Mervyn Fathianathan, the CEO of Scientific Innovations Company. Scientific Innovations Company will initially share an office with Majesty in Phnom Penh.

We are also developing automated technology in the food and beverage industry and further innovations in hair-care.

Training Period

We aim to create a team of high quality developers in Web, Android and iOS to work on development projects in Phnom Penh. As Phnom Penh continues to grow and develop, particularly in terms of new buildings and construction projects, expansion in Cambodia for Scientific Innovations Company is essential to expanding our global presence in emerging markets.

Majesty is our partner company in Cambodia. It is a new construction company that is expected to grow significantly within the next year. **You will be share an office with Majesty, but will work on projects for Scientific Innovations Company.**

Your role will be to work as part of a small group on a number of projects for Scientific Innovations Company. These projects may include:

1. Development of websites from start-to-finish for new companies
2. Work with our developers in Singapore to maintain and update current websites
3. Testing and de-bugging of new or current websites
4. To learn new skills in entrepreneurship, project management and business development (as we are a start-up company, we put great emphasis on creativity and innovation)
5. You may receive training and complete projects in developing Android applications

The training period will last six months. **Training is entirely project-based.** You will work with an experienced, Cambodian web-developer. You will also be in contact with developers in Singapore who will provide instructions, help and guidance in projects.

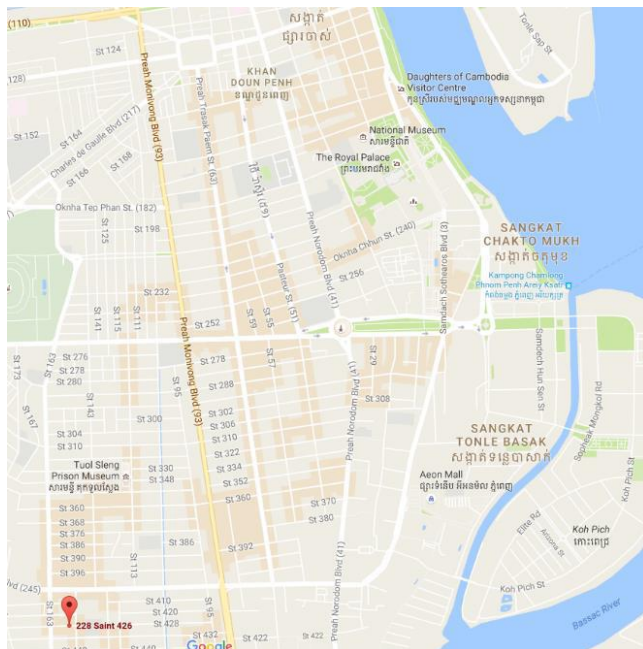

The senior developer will assess your performance through presentations of your work, demonstrating more advanced aspects of web development (which you may not be familiar with), and by assigning smaller tasks/projects to determine your progress.

After six months, you will be employed as a full-time software developer for Scientific Innovations Company. **Any salary increases will be subject to performance and review.**

Phnom Penh Office

Our office in Phnom Penh is new and is still being set-up. We expect for you to begin work with us in October – **Monday 17th October is currently the expected date for you to start.** The office will be a relaxed environment – no uniform (wear what you want and be comfortable) – and enjoy working with your colleagues.

Your work week is expected to be **Monday to Friday, 9AM to 6PM** (Hours may vary).
